

OUR ACADEMIC PROGRAMS

Centennial College offers three DEC programs in Social Sciences, Social Sciences for Commerce, and Creative Arts as well as a one year, Bridge to Science Program that lets students “left behind” in math and sciences make up their advanced high school science prerequisites while studying core DEC subjects in languages and the humanities. We accept new admissions throughout the school year.

Our goal in all our academic programs is to help young people strive for their personal best – whether that means achieving a higher “R Score” for university entrance or simply becoming the kind of person who lives to learn. Our experience is that young people love learning but often lack the skills and motivation to succeed at school.
